Feedback collection on curriculum

Sr no	Suggestions	Action taken
1	Teaching or guiding for future MDS prep and gov Dental officer exams	Every department organizes MCQ based exam during their posting schedule for preparation of PG NEET exam. College authority has planned for collaboration with professionals who conduct classes for preparation of government exams of dental officer.
2	Advance rotary instruments and complex case handling	Students have been exposed to all high-end equipment during their internship period. Also, they are allowed to see and assist all surgical procedure. This issue was resolved
3	More visual and more extracurricular activities required. More interaction needed.	From this year sports teacher has started organizing various sports events. Students from all batches have visited to Pune for intercollege competition in MAEER colleges.
4	More updated techniques like rotary, Laser dentistry, esthetic dentistry should be practiced	Advance rotary instruments should be used with caution in Patients mouth. It will be provided during internship period. Interns are allowed to assist during LASER surgical procedure. As well as CDE activity along with hands on is been organized by Dept. of Periodontology in academic year 24-25

Stakeholder- Faculty

1	Lectures are taken in Marathi and is completely wrong. Are students going to write in regional language	MUHS have received a letter from honorable Chancellor to provide education in the regional language. As well the guidelines and remembrance letter -1 from MUHS/114103/UG&PG/58 circular dated 05/01/2024 few chapters from curriculum is been

Feedback Analysis process

BACKGROUND

MAEER'S, Maharashtra Institute of Dental Sciences and Research (Dental College) promised to offer need based curriculum for providing excellent academic environment, spiritual vitality, and social relevance with an initiative to drive entrepreneurial capability and harnessing innovation from an educator's perspective.

The Institute has well defined procedure for design, development, and revision of curriculum as continuous process to achieve the necessary programme outcomes and course outcomes that are adhered with strict compliance to the regulatory bodies. MIDSAR also has state of art infrastructure with adequate physical facilities for curriculum implementation, teaching-learning, and skill acquisition, as stipulated by appropriate regulatory authorities.

Our success reflects our stakeholders' success. An extremely important tenet of achieving this excellence is utilizing feedback from various stakeholders for improving and updating the quality of education we provide. Hence, we have a mechanism in place for taking feedback from the following stakeholders, as stipulated by National Assessment and Accreditation Council (NAAC):

QUESTIONNAIRE

Questionnaires for taking feedback from the above stakeholders were developed as per Standard Operating Procedure (SOP) for Feedback. Response collection For the Academic Year 2023-24, we continued with our in-house platform for collecting feedback based on the encouraging feedback.

Sr no	Stakeholders	Responses
1	Students	129
2	Faculty	18
3	Parents	18
4	Alumni	6

		translated in Marathi by many of our college teachers. So, Marathi language can be used during teaching activity for better understanding of students.
2	Though internal assessments are conducted, students don't perform to their best So that they will end up in low avg in Int Ass and fail in University. This problem should be focused department wise.	Theory lectures and clinics for All IV-year subjects will start from III BDS so, students don't pay attention during III year. So, it is advised to conduct a revision lecture once the batch enters in IV BDS. Also, additional practice exam would be helpful to improve the scores for students.
3	Regular updates about newer materials, equipment's and technology would be helpful for all UG and PG students.	BDS curriculum should be updated so that undergraduates should get information about newer materials and technology. This task should be undertaken by subject teacher as they will be having knowledge of newer technologies.

Stakeholder- Alumni

Sr no	Suggestions	Action taken
1	It is important to teach about new skills and technologies in college, and to provide practice with tools like endo motors and apex locators. Along with the academic syllabus, it is necessary to discuss the actual problems encountered in practice and their solutions. Students should be encouraged to have a positive attitude towards their field and be instilled with confidence. Through various programs, students should be informed about clinical and non-clinical job opportunities after BDS, so that their minds are clear about what they want to do in the future. It is also important to keep students updated about recent technologies.	The undergraduates during their internship were allowed to observe and assist advanced surgical procedure. those interns who complete their endo quota sincerely in due time were allowed to use proteper hand instruments.
2	It would be better if provided with at least the basic knowledge and handling of recent techniques that are routinely practiced in private settings.	As all advanced equipment's are introduced to students during their internship, also they are allowed to assist, observe special cases performed in postgraduate clinic.

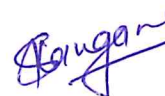

Stakeholder- Parent

Sr no	Suggestions	Action taken
1	Pt. Quota up to final year, must include advanced procedures	Students are provided clinical exposure from their III year till internship. During internship depending upon their performance students are allowed to handle equipment's and to perform advanced procedures.
2	To have more clinical procedure	Students are allowed to performs clinical procedure from their third-year postings up to internship.
3	Improve hostel facility	Hostel committee was informed about the feedback.
