The program was successfully organized to create awareness among dental faculty members, postgraduate students, interns, and practitioners regarding the importance of Intellectual Property Rights (IPR) in dental education, research, and clinical practice.

Participants were sensitized to various forms of IPR such as patents, copyrights, trademarks, industrial designs, and trade secrets, with specific emphasis on their application in dentistry. Practical examples related to dental materials, instruments, innovative clinical techniques, digital dentistry, and academic content creation were discussed.

Interactive sessions and case-based discussions were conducted. Participants were encouraged to identify potential innovations in their own clinical and research work.
