DEPARTMENT OF PROTHODONTICS CROWN AND BRIDGE

Report For webinar on 'Occlusion in Fixed Prosthodontics'

MIDS R Dental college, Latur in collaboration with DOCPLEXUS arranged a webinar on "Occlusion in Fixed Prosthodontics" on 03/08/2025 at 11:00 am Speaker Dr. Bhushan Bangar, Professor and Head, Dept of Prosthodontics & Crown and Bridge, MIDS R Dental college, Latur.

Venue: Virtual Mode. (Google meet)

Event details:

Introduction:

Occlusion plays a pivotal role in the success and longevity of fixed prosthodontic restorations. Improper occlusal design may lead to mechanical failures, patient discomfort, temporomandibular disorders (TMDs), or excessive wear of opposing dentition. Hence, accurate evaluation and correction of occlusion is essential during all stages of treatment.

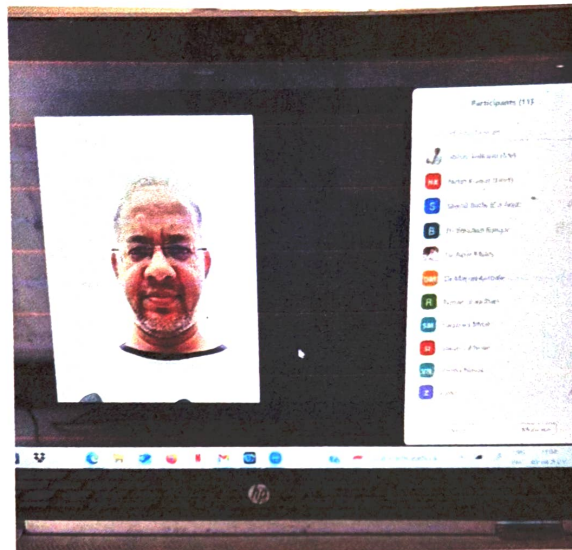

The webinar started by 11:00 am . Dr. Abhay Kulkarni welcomed all delegates Total 49 participants attained the program (9 faculties and 38 students and 2 clinicians) introduced the speaker and gave vote of thanks. Dr. Bhushan Bangar gave a brief insight and even had an interactive questionnaire session. The webinar was appreciated by many persons in the chat box.

OVERVIEW OF THE PROGRAMME:

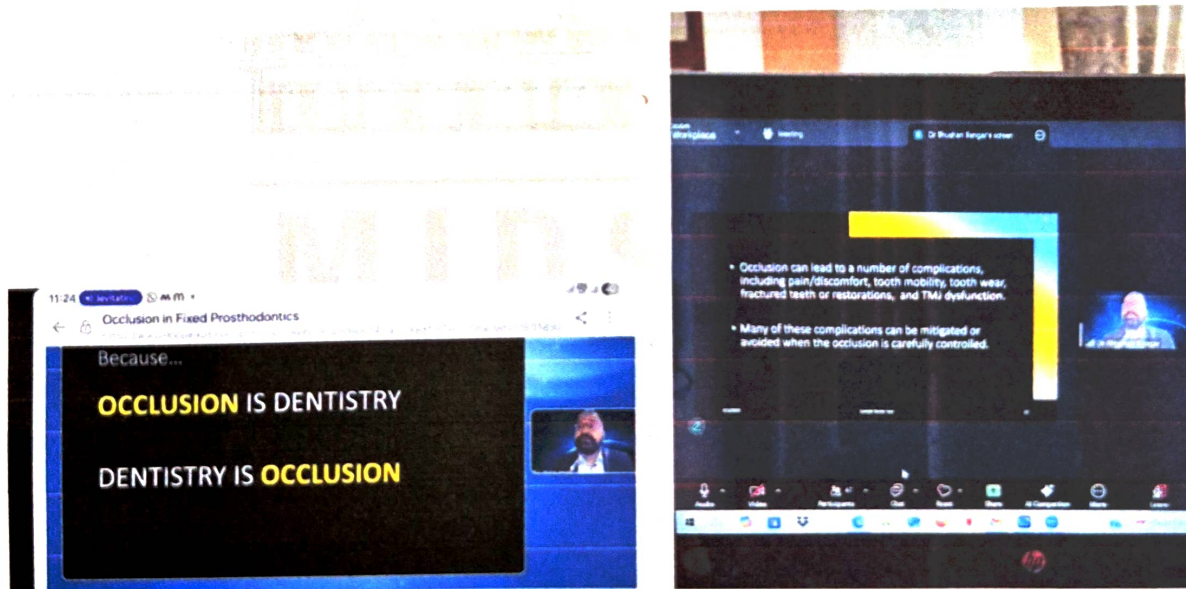

The evaluation and correction of occlusion in fixed prosthodontics are critical to the functional success and longevity of restorations. Through systematic analysis, careful planning, and accurate execution at each stage — from diagnosis to post-insertion follow-up — harmonious occlusal relationships were achieved. These measures not only minimized complications but also enhanced patient comfort, masticatory efficiency, and long-term prosthetic success. Continued emphasis on occlusal management should remain an integral part of all fixed prosthodontic procedures.
